

### **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

Claim 1 (currently amended): An In Plane Switching liquid crystal display comprising:

a first substrate, and a second substrate disposed oppositely the first substrate and spaced apart from the first substrate a predetermined distance;

a liquid crystal layer interposed between the first substrate and the second substrate;

a plurality of common electrodes and pixel electrodes formed on the first substrate, parallel to each other; and

a plurality of conductive spacers formed on the common electrodes and the pixel electrodes, and electrically connected to the common electrodes and the pixel electrodes;

wherein each of the spacers comprises a spacer rib having a form of a parallelepiped, and a conductive film provided on all surfaces of the spacer rib.

Claims 2-4 (canceled)

Claim 5 (currently amended): The In Plane Switching liquid crystal display as claimed in claim ~~[[2]]~~ 1, wherein the spacer rib is made ~~[[of]]~~ from glass.

Claim 6 (currently amended): The In Plane Switching liquid crystal display as claimed in claim ~~[[2]]~~ 1, wherein the spacer rib is made ~~[[of]]~~ from SiO<sub>2</sub>.

Claim 7 (currently amended): The In Plane Switching liquid crystal display as claimed in claim [[2]] 1, wherein the conductive film is made [[of]] from ITO.

Claim 8 (currently amended): The In Plane Switching liquid crystal display as claimed in claim [[2]] 1, wherein the conductive film is made [[of]] from conductive metal.

Claim 9 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, wherein the common electrodes and the pixel electrodes are made [[of]] from ITO.

Claim 10 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, wherein each of the first substrate and the second substrate are is made [[of]] from one of glass and SiO<sub>2</sub>.

Claim 11 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, further ~~comprises~~ comprising an insulating film disposed ~~between~~ among the common ~~electrode~~ electrodes and the pixel ~~electrode~~ electrodes.

Claim 12 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 11, wherein the insulating film is made [[of]] from one of SiO<sub>2</sub> and SiNx.

Claim 13 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, further ~~comprises~~ comprising two polarizers formed on two sides of the first substrate and the second substrate, respectively.

Claim 14 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, further ~~comprises~~ comprising an alignment film formed on one of the first substrate and the second substrate.

Claim 15 (currently amended): The In Plane Switching liquid crystal display as claimed in claim 1, further ~~comprises~~ comprising a color filter formed on an inner surface of the second substrate facing ~~[[to]]~~ toward the liquid crystal layer.

Claims 16-17 (canceled)
